

HALIM BAČIĆ

SOFTWARE DEVELOPER

I am a software developer with a background in backend development using .NET. I was born in Gradiška, Bosnia and Herzegovina, in 1995 and currently reside and work in Banja Luka. My expertise includes Java, Spring, C, C++, React, and Android development, with ongoing self-learning in Python. I have experience working with MySQL databases. For more details about my projects, you can find them on my GitHub profile or feel free to connect with me personally.
